

Geotechnical Engineer/Coal Geologist (Greenfield)

It's not every day you have the opportunity to be involved in the start-up of a new mine... To make your mark and be there from the beginning. Well here is that long-awaited, unique opportunity to do just that - a Greenfield mine in the Hunter Valley with all the associated excitement of building and being part of something new.

The **Maxwell Underground Project**, owned by **Malabar Resources Ltd** has commenced construction and production of up to 8 million tonnes of coal per annum. With a long life, the underground mine targets high quality coal, with the majority being metallurgical coal.

An attractive remuneration package will be offered to secure the preferred candidate.

Job Responsibilities:

- Managing and updating geotechnical models, databases and plans
- Reviewing and designing strata support
- Geotechnical and conditional mapping
- Reviewing and analysing strata monitoring
- Managing strata documentation (e.g., TARP's, procedures, plans, etc.)
- Supporting technical and production processes for drift driveage, longwall and bord and pillar mines
- Contractor management
- Management and update of the geological model and database and report
- Development and oversight of exploration programs

Skills and Experience:

- **Previous experience in underground coal** is a must
- Degree (or equivalent) in Mining Engineering or Geology, with Post-Graduate qualifications in Strata Control
- Experience with the monitoring and design of underground support systems
- Knowledge of stratigraphic modelling software

Desirable requirements:

- Statutory Ventilation Officer Qualification
- Strata Control Qualification
- Contractor Management
