

Senior Electrical Engineer

It's not every day you have the opportunity to be involved in the start-up of a new mine... To make your mark and be there from the beginning. Well here is that long-awaited, unique opportunity to do just that - a Greenfield mine in the Hunter Valley with all the associated excitement of building and being part of something new.

The **Maxwell Underground Project**, owned by **Malabar Resources Ltd** has commenced construction and production of up to 8 million tonnes of coal per annum. With a long life, the underground mine targets high quality coal, with the majority being metallurgical coal.

Malabar is now seeking an energetic and skilled **Senior Electrical Engineer (Electrical Engineering Manager)** to be based at the Maxwell site, 10 minutes from the township of Muswellbrook. Reporting to the Engineering Manager, this is a key role in our site based statutory team.

Specific responsibilities include:

- Statutory function of Electrical Engineering Manager
- Develop, supervise, monitor and review the electrical engineering standards and procedures forming part of mining operations at the mine
- Supervise the installation, commissioning, maintenance and repair of electrical plant and installations at the mine
- Develop and implement the electrical engineering safety management system for the Maxwell Underground site.
- Provide assistance with the procurement and implementation of critical mining infrastructure and equipment.
- Provide technical input and participate in developing condition and performance monitoring systems for critical equipment
- Establish safe work procedures and training packages for personnel in major electrical works such as HV switching, isolation and testing
- Identify and implement opportunities to improve plant reliability and reduce maintenance expenditure

Essential requirements:

- Practising Certificate - Electrical Engineering Manager of Underground Mines
- Electrical Engineers Certificate of Competence UG Coal Mines
- Minimum of at least 5 years practical experience working in an underground coal mine operation
- Detailed knowledge of relevant statutory regulations and standards
- Strong technical, leadership, and problem-solving skills
- Good interpersonal and communication skills

This position requires a can-do attitude and hands-on approach. The successful candidate must be prepared to contribute effectively in a lean team environment. An attractive remuneration package will be offered to secure the preferred candidate. For information on Malabar Resources Ltd, please visit www.malabarresources.com.au
