

Underground Mine Manager (Coal)

It's not every day you have the opportunity to be involved in the start-up of a new mine, to make your mark and be there from the beginning. Well here is that long-awaited, unique opportunity to do just that - a Greenfield mine in the Hunter Valley with all the associated excitement of building and being part of something new.

The **Maxwell Underground Project**, owned by **Malabar Resources Ltd** has commenced construction and production of up to 8 million tonnes of coal per annum. With a long life, the underground mine targets high quality coal, with the majority being metallurgical coal.

Malabar is now seeking an energetic and skilled **Underground Mine Manager**. This key leadership role will form part of the team that commences the construction of our new, highly productive, world class underground longwall mine, beginning immediately with the commencement of bord and pillar mining. The role will be fundamental in the development and operational success of the Maxwell Underground Mine and will be based at the Maxwell site, 10 minutes from the township of Muswellbrook.

Accountable for the detailed planning and project execution activities associated with development of the underground mine. The position reports to the General Manager – Development & Operations.

Specific responsibilities include:

- Overall management of key underground infrastructure construction e.g. Mine Access Drifts
- Detailed mine design and operational strategy planning and readiness;
- Systems and personnel operational readiness;
- Delivery of the 3-5 year Mine Operating Plan and budget
- Overall management of the of weekly operating plan;
- Statutory Role of Mining Engineering Manager.

Essential requirements:

A tertiary engineering qualification combined with a current Practising Certificate to exercise the Statutory function as Mining Engineering Manager for NSW Underground Coal Mines.

This position requires a can-do attitude and hands-on approach. The successful candidate must be prepared to make decisions, challenge the norm and contribute effectively in a lean team environment. Recent experience in the development and/or operation of a highly productive underground longwall mine will be highly regarded, as will bord and pillar mining exposure.

Attractive remuneration packages will be offered to secure the preferred candidate.
