

## Environmental Policy

Malabar Resources Ltd (Malabar) is committed to minimising our impacts and conserving ecological processes in the communities we share through operating in an environmentally responsible manner.

### Malabar believes in:

- Establishing and promoting good environmental practices into all activities and decision-making processes
- Maintaining a risk-based approach to managing environmental impacts to achieve a level as low as reasonably practical
- Promoting a culture of sustainability and social responsibility within our operations and surrounding communities

### We will demonstrate our commitment to the environment by:

- Establishing measurable objectives and targets for environmental performance based around the delivery of continual improvements in our performance
- Ensuring we comply with all applicable environmental legislation and compliance requirements
- Establishing and maintaining programs to minimise land disturbance and achieve a safe, stable and non-polluting final landform
- Implementing all practical measures to minimise air quality emissions
- Effectively managing our water resources to minimise the use of water from external sources
- Developing and maintaining mutually beneficial relationships with local communities, organisations, and relevant stakeholders
- Communicating this policy to all employees and contractors so they understand our requirement for them to comply with this policy
- Continually reviewing our processes so that we learn from the past, and where beneficial, adopting positive improvements for the future

Our goal is to always operate in an environmentally responsible manner. Commitment to helping us achieve this is expected of all persons associated with our sites.
